Soft Skills	Leadership, Time Management, Punctual, Quick Learner

PROJECTS WORKED WITH

1. SMART DOCTOR APP

Smart doctor app helps doctors schedule and get appointments. 3 sections are available with dashboards & login (admin, doctor & patient). Patients can get appointments by login & medicines through delivery by completing their payment.

2. CHAT APPLICATION

This is a simple chatting application where any added user can chat with other added users, and delete and search users. Admin can add and delete any user. Also, a user can enter by signing in.

3. E-COMMERCE WEBSITE

E-commerce website design involves creating and launching a virtual store to sell products. Here, people can buy physical goods, services, and digital products over the Internet. Also allows visitors to find their product(s), add them to their "cart," and securely enter their payment information to complete their purchase.

4. ToDo LIST PROJECT

The To-Do List project is built to keep track of the tasks and able to enter the tasks that the user needs to do. Once they are done with their tasks they can also remove and tick them.

HTML CSS JavaScript

5. PORTFOLIO

Here I simply use HTML and CSS and try to give a simple description of myself. Also, I mention my skills and description of my projects.

HTML CSS

PUBLICATIONS

THESIS : TOURIST SPOT RECOGNIZATION USING MACHINE LEARNING ALGORITHMS.
